

MARGHERITA – VOICE OF THE STARS

A Rai Documentari and Minerva Pictures Group co-production, Margherita. La voce delle stelle (Voice of the Stars) is a documentary celebrating the centenary of Margherita Hack's birth. Narrating the story is the great scientist's own voice: thanks to exclusive recordings made possible by journalist Federico Taddia, it is Margherita Hack herself who takes us through a journey retracing anecdotes of her life. In this she is joined by important testimonies, such as that of her heir Tatjana Gjergo, who for the first time ever decided to share her memories and personal archive.
